

## Topic & timeline for the next SIG

*Thursday, 17 November 2022 11:30 (15 minutes)*

When/where the 3rd Tango SIG will be held, or how we are going to decide on that.

A proposal that came up was “Tango Controls IDL v6”, to discuss what should be in there and make an initial version (rc) for the IDL v6 file. The IDL v6 could support proposed functionality such as N-dimensional arrays, ALARM events, etc.
