ASTERICS Periodic Review 1

WP 1 Management

Rob van der Meer, Giuseppe Cimo', Fabio Pasian

Governance

How did we manage the project?

- Weekly AMST meetings (f2f)

- Bi-monthly AEB meetings (Vidyo, f2f)
  - Written reports in agenda
  - Discussion during meetings

- 9-monthly AGA meetings (f2f + Vidyo)
  - Reporting to and input from 23 partners
  - External Advisory Board (ESFRIs + ERANETs)

Management Team

- Visits to internal project meetings

- Visits to Forums and Schools

- Visits to conferences to represent ASTERICS

Chair of AGA

It is useful for the project to have an active chair of the AGA

- Independent of Coordinator (important when coordinator lead was changing)

- Representing the AGA (all partners)

- Attending the AEB meetings

- Extra interface to the outside world

- Someone who can criticise without needing to find the solution.

Quality Assurance

Quality assurance for Deliverables:

content and report

- Plan of timeline for report with internal reviews

- Task leaders report to WP leaders

- WP leaders report to AEB on progress

Financial control

- We request 6 months reports from partners and provide an integrated report for the project with projections.
  See financial report.

External influences

- Exploitation plan

- Collaboration plan

Collaboration plan

ASTERICS actively strengthens the collaboration between its partners and the ESFRIs

- EC and non-EC funded projects
  ASTRONET, APPEC, OPTICON, Europlanet.
  New ESFRI EST. H2020 projects: RadioNet, JUMPING JIVE,
  AENEAS, EGI, AARC,…

- Industries
  Oracle, Nvidia, IBM,…

- research organizations
  CERN, ESA, Universities,...

- unidentified interested parties
  Zooniverse opens ASTERICS to a wider audience

Strengthen the links created and seek new ones

Our goal is the long-term fostering of the links created by ASTERICS

Exploitation plan

Ensure ASTERICS dissemination to a wide range of research fields and industry sectors

Promotional material
website, brochure, banners, pens,…

Participation in big international events
EWASS, ADASS,…

Organization of meetings
VO schools, Technology forums, Software and
programming workshops,…

Increase the visibility of ASTERICS results

Our goal is to ensure the long-term exploitation of ASTERICS results

Ongoing issue

- Cluster positioning
  - We cannot represent the individual ESFRIs
  - Our role is to represent the cluster of our ESFRIs
- This happens already
  - Contacted for e.g. EOSC call
  - ASTRONET and APPEC are in the AEAB
- Policy Forum can improve this
