

AENEAS WP2 Break-out

- WP2 Mailing list/exploder - send me email at haarlem@astron.nl
- T2.1 Inventory of national and European facilities + commercial providers of computing, data storage and networking services
 - Academic providers of storage, networking and computing
 - Commercial providers (Amazon, Google, others)
 - Partnerships beyond radio astronomy
 - Are academic providers interested in ESDC
 - Forward look - roadmaps, when do you need to engage to be ready 2021/22?
 - Any idea of the funding mechanism for facilities
 - EGI, EDA and Geant (and others?) can help us target national facilities
 - Reach out to: EU-T0, UK-T0, EUDAT/EOSC, ETP4HPC, PRACE,... CERN, ESS, MAX IV
 - Deadline: end of April for initial input
 - Reasons we shouldn't share any of this data within AENEAS project?

WP2 Breakout continued (1)

- T2.2 User Community Requirements
- Partners: ASTRON, Chalmers - but need more involvement - at least for distribution
- Work closely with WP3 and WP5 on questionnaire
 - First draft in preparation; to be circulated
- How do we contact astronomers outside SKA inner circles prepared to give us feedback on how we can entice them to use SKA (/radio) data in their research?
- Survey complete by M9
- Users committee - draw from respondents to questionnaire or otherwise?
- Workshop? with users committee or larger group? M15
- Reach out at EWASS, other events (NAM, NAC, ...) - prepare standard presentation.
- Input: user requirements, example use cases.

WP2 Breakout continued (2)

- T2.3 Governance and Business Models for a European SKA Data Centre
 - D2.3 at M36
 - indication of partial resources from T2.1
 - identify stakeholders
 - how do we approach/bring in stakeholders
 - individually or collectively
- T2.4 Design Study of a European SKA Science Data Centre
 - D2.4 at M33
